PRODUCT SAFETY SERVICING GUIDELINES FOR AUDIO-VIDEO PRODUCTS

IMPORTANT SAFETY NOTICE

This manual was prepared for use only by properly trained audio-visual service technicians.

When servicing this product, under no circumstances should the original design be modified or altered without permission from Zenith Electronics Corporation. All components should be replaced only with types identical to those in the original circuit and their physical location, wiring and lead dress must conform to original layout upon completion of repairs.

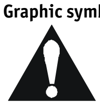

Special components are also used to prevent x-radiation, shock and fire hazard. These components are indicated by the letter "x" included in their component designators and are required to maintain safe performance. No deviations are allowed without prior approval by Zenith Electronics Corporation.

Circuit diagrams may occasionally differ from the actual circuit used. This way, implementation of the latest safety and performance improvement changes into the set is not delayed until the new service literature is printed.

Caution: Do not attempt to modify this product in any way. Never perform customized installations without manufacturer's approval. Unauthorized modifications will not only void the warranty, but may lead to property damage or user injury.

Service work should be performed only after you are thoroughly familiar with these safety checks and servicing guidelines.

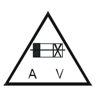

Graphic symbols

The exclamation point within an equilateral triangle is intended to alert the service personnel to important safety information in the service literature.

The lightning flash with arrowhead symbol within an equilateral triangle is intended to alert the service personnel to the presence of noninsulated "dangerous voltage" that may be of sufficient magnitude to constitute a risk of electric shock.

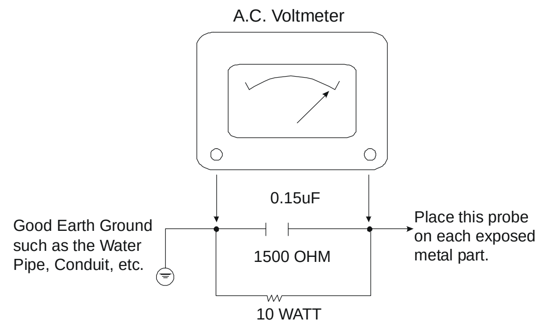

The pictorial representation of a fuse and its rating within an equilateral triangle is intended to convey to the service personnel the following fuse replacement caution notice:
CAUTION: FOR CONTINUED PROTECTION AGAINST RISK OF FIRE, REPLACE ALL FUSES WITH THE SAME TYPE AND RATING AS MARKED NEAR EACH FUSE.

SERVICE INFORMATION

While servicing, use an isolation transformer for protection from AC line shock. After the original service problem has been corrected, make a check of the following:

FIRE AND SHOCK HAZARD

1. Be sure that all components are positioned to avoid a possibility of adjacent component shorts. This is especially important on items transported to and from the repair shop.
2. Verify that all protective devices such as insulators, barriers, covers, shields, strain reliefs, power supply cords, and other hardware have been reinstalled per the original design. Be sure that the safety purpose of the polarized line plug has not been defeated.
3. Soldering must be inspected to discover possible cold solder joints, solder splashes, or sharp solder points. Be certain to remove all loose foreign particles.
4. Check for physical evidence of damage or deterioration to parts and components, for frayed leads or damaged insulation (including the AC cord), and replace if necessary.
5. No lead or component should touch a receiving tube or a resistor rated at 1 watt or more. Lead tension around protruding metal surfaces must be avoided.
6. After re-assembly of the set, always perform an AC leakage test on all exposed metallic parts of the cabinet (the channel selector knobs, antenna terminals, handle and screws) to be sure that set is safe to operate without danger of electrical shock. DO NOT USE A LINE ISOLATION TRANSFORMER DURING THIS TEST. Use an AC voltmeter having 5000 ohms per volt or more sensitivity in the following manner: Connect a 1500 ohm, 10 watt resistor, paralleled by a .15 mfd 150V AC type capacitor between a known good earth ground water pipe, conduit, etc.) and the exposed metallic parts, one at a time. Measure the AC voltage across the combination of 1500 ohm resistor and .15 mfd capacitor. Reverse the AC plug by using a non-polarized adaptor and repeat AC voltage measurements for each exposed metallic part. Voltage measured must not exceed 0.75 volts RMS. This corresponds to 0.5 milliamp AC. Any value exceeding this limit constitutes a potential shock hazard and must be corrected immediately.

X-RADIATION

1. Be sure procedures and instructions to all service personnel cover the subject of x-radiation. The only potential source of x-rays in current TV receivers is the picture tube. However, this tube does not emit x-rays when the HV is at the factory-specified level. The proper value is given in the applicable schematic. Operation at higher voltages may cause a failure of the picture tube or high-voltage supply and, under certain circumstances may produce radiation in excess of desirable levels.
2. Only factory-specified CRT anode connectors must be used.
3. It is essential that the service personnel have available an accurate and reliable high-voltage meter.
4. When the high-voltage circuitry is operating properly, there is no possibility of an x-radiation problem. Every time a color chassis is serviced, the brightness should be run up and down while monitoring the high voltage with a meter, to be certain that the high voltage does not exceed the specified value and that it is regulating correctly.
5. When troubleshooting and making test measurements in a product with a problem of excessively high voltage, avoid being unnecessarily close to the picture tube and the high voltage power supply. Do not operate the product longer than necessary to locate the cause of excessive voltage.
6. Refer to HV, B+, and shutdown adjustment procedures described in the appropriate schematics and diagrams (where used).

IMPLOSION

1. All direct view picture tubes are equipped with an integral implosion protection system; take care to avoid damage during installation.
2. Use only the recommended factory replacement tubes.

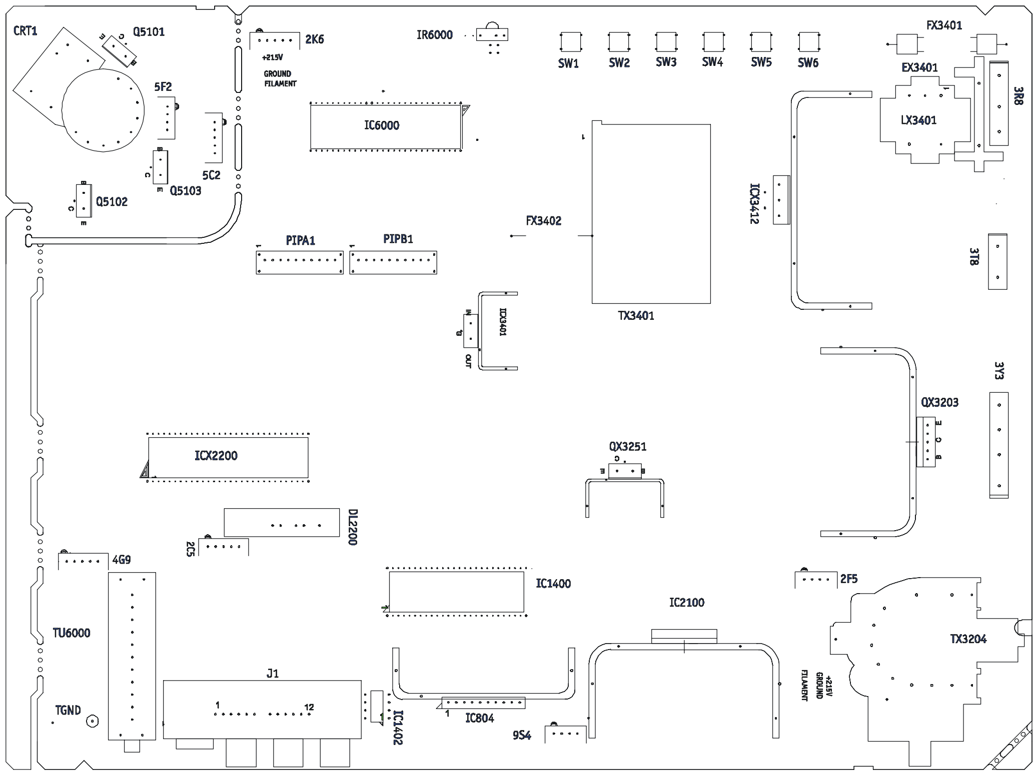

TIPS ON PROPER INSTALLATION

1. Never install any receiver in a closed-in recess, cubbyhole, or closely fitting shelf space over, or close to, a heat duct, or in the path of heated air flow.
2. Avoid conditions of high humidity such as: outdoor patio installations where dew is a factor, near steam radiators where steam leakage is a factor, etc.
3. Avoid placement where draperies may obstruct venting. The customer should also avoid the use of decorative scarves or other coverings that might obstruct ventilation.
4. Wall- and shelf-mounted installations using a commercial mounting kit must follow the factory-approved mounting instructions. A product mounted to a shelf or platform must retain its original feet (or the equivalent thickness in spacers) to provide adequate air flow across the bottom. Bolts or screws used for fasteners must not touch any parts or wiring. Perform leakage tests on customized installations.
5. Caution customers against mounting a product on a sloping shelf or in a tilted position, unless the receiver is properly secured.
6. A product on a roll-about cart should be stable in its mounting to the cart. Caution the customer on the hazards of trying to roll a cart with small casters across thresholds or deep pile carpets.
7. Caution customers against using a cart or stand that has not been listed by Underwriters Laboratories, Inc. for use with its specific model of television receiver or generically approved for use with TVs of the same or larger screen size.
8. Caution customers against using extension cords. Explain that a forest of extensions, sprouting from a single outlet, can lead to disastrous consequences to home and family.

TABLE OF CONTENTS

TABLE OF CONTENTS

OVERVIEW

The GA series chassis was developed for Sentry 2, screen sizes 19" through 27" stereo and mono models. The chassis is a single sided printed circuit board. One board is used for the 19" and 20" connected sets. A second board is used on the 25" and 27" isolated sets. During the manufacturing process, the EAROM is programmed for any added features. Output jacks will be added to the board to accommodate the different features: Video/ Audio In, Non MTS Stereo, and MTS Stereo.

The GA series chassis features three IC's for all signal, sync and sweep processing. ICX2200 handles all of the audio/video, sync and sweep drive processing. IC6000 is the microprocessor and IC6001 is the EAROM memory. The keyboard and IR detector are tied directly to IC6000. IC2100/2101 handles the vertical sweep.

At turn on, voltages for the vertical and video output circuit are derived from the sweep circuit.

The GA chassis is comprised of three (3) categories. GA-1, GA-2, and GA-3. Each category represents the screen size and different model feature levels.

The GA-1 chassis had five module variations which are as follows:

9-1869 (19/20V, Mono) Main Module w/o Jack Assy.

9-1870 (19/20V, Non MTS Stereo) Main Module w/o Jack Assy.

9-1871 (19/20V, MTS Stereo) Main Module w/3 Jack Assy, A-18577.

9-1950 (19/20V, Mono) Main Module w/2 Jack Assy, A-18577-01.

The GA-2 chassis has three module variations which are as follows:

9-1789 (25V, Mono) Main Module w/o Jack Assy.

9-1790 (25V, Stereo) Main Module w/3 Jack Assy, A-18577.

9-1791 (27V, Non MTS Stereo) Main Module w/3 Jack Assy, A-18577.

9-1831 (25V Stereo) Main Module w/3 Jack Assy. A-18577.

9-1831 (25V, Stereo) Main Module w/3 Jack Assy, A-18577.

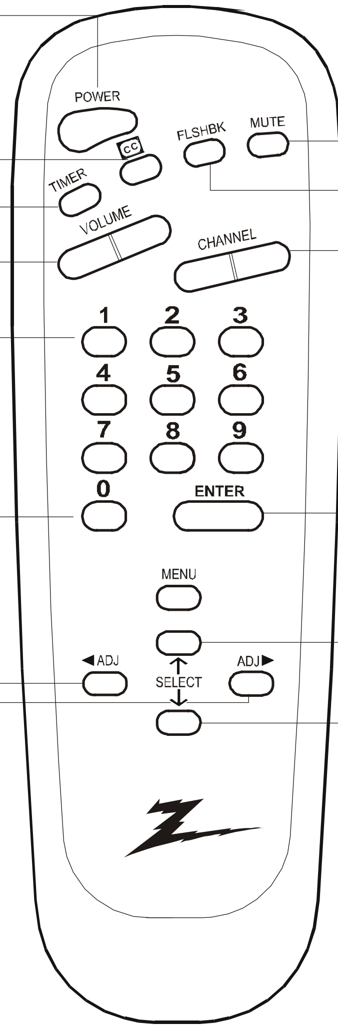

The GA-3 chassis also has three module variations which are as follows:

9-1996 (25V, MTS Stereo) Main Module w/5 Jack Assy, A-18785.

9-1997 (27V, MTS Stereo) Main Module w/5 Jack Assy. A-18785.

9-1998 (27V, MTS Stereo) Main Module w/5 Jack Assy. A-18785.

SC3492A MODEL REMOTE CONTROL

POWER
Press to turn TV ON or OFF

CC
Press to access closed captions.

TIMER
Press (and repeat) to activate the sleep timer

VOLUME
Press left to reduce or right to increase volume level of TV.

NUMBERED BUTTONS
Press repeatedly to select desired menu.

ADJUST (Left/Right)
Press during on-screen menu operations to adjust an option.

MUTE
Press to turn off sound while picture remains. Press again to restore sound.

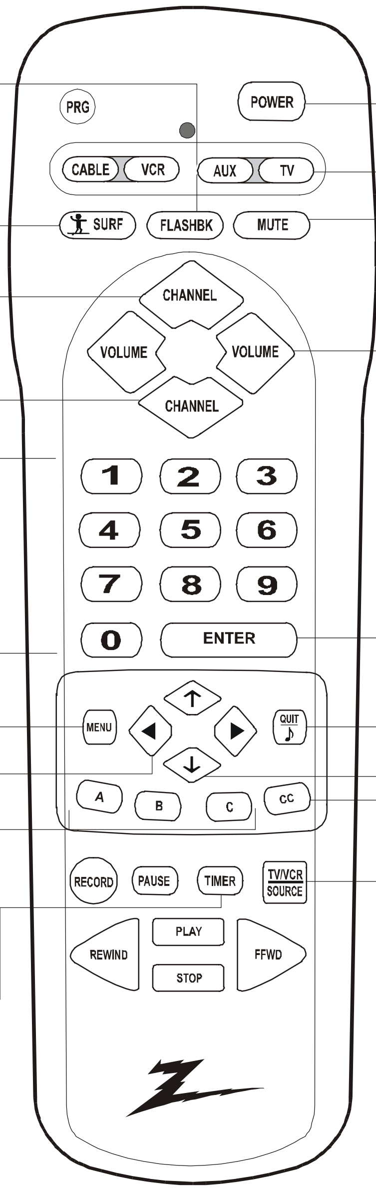

FLSHBK
Press to return to last TV channel you were watching.

CHANNEL Up/Down
Press to select a TV channel by going up/down through channels programmed in the TV memory.

ENTER
Press to view Channel/Time Display or to remove any on-screen menu or display in TV mode. Press to view the Music menu (active station) listing in FM mode.

SELECT
Press during on-screen menu operations to select an option.

SC3492A
124-00213-16

FLASHBK (Flashback)
Returns to previous Channel.

SURF
Turns Surf Channel On/Off

CHANNEL (Up/Down)
Selects next channel in TV's memory. Press and hold to repeat.

NUMBER PAD
Selects channels directly.

MENU
Displays menus for TV and other options.

LEFT/RIGHT ARROWS
Chooses and shows the desired menu option.

A, B, C Keys
Special features of some TV's

TIMER
Displays the Sleep Timer menu. Press repeatedly to set desired TV shut-off time.

POWER
Turns TV On or Off.

MODE
Selects the remote's mode of operation

MUTE
Turns sound Off and On while picture remains.

VOLUME (Left/Right)
Increases TV's sound level.

ENTER
Shows Channel/Time, enters channel, or removes any on-screen menus.

QUIT/♪ (Three Functions Key)
Exits from on-screen display, turns the sound enhancement feature on or off, and switches audio between Main source and PIP source.

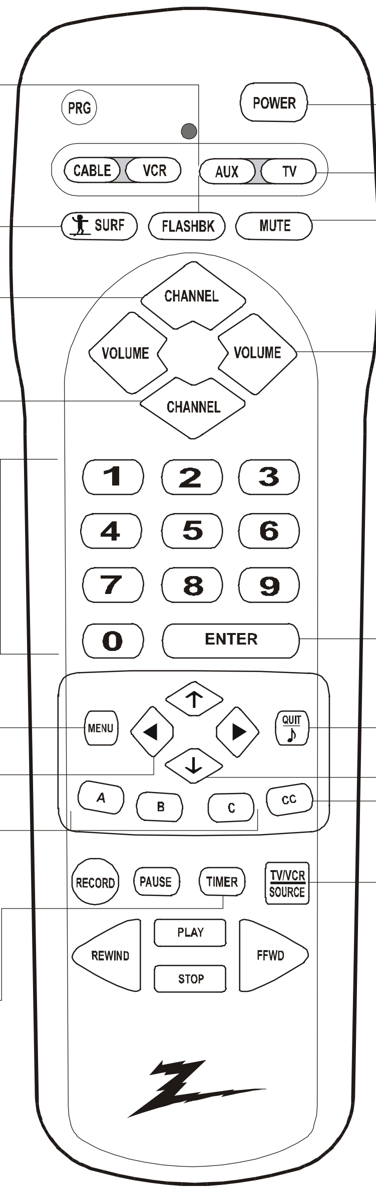

UP and DOWN ARROWS
Moves highlighted bar within menu to select an option.

CC
Displays closed caption menu.

TV/VCR SOURCE
Steps through source options.

MBR3447
124-00212-35

MBR3447A MODEL REMOTE CONTROL

FLASHBK (Flashback)
Returns to previous Channel.

SURF
Turns Surf Channel On/Off

CHANNEL (Up/Down)
Selects next channel in TV's memory. Press and hold to repeat.

NUMBER PAD
Selects channels directly.

MENU
Displays menus for TV and other options.

LEFT/RIGHT ARROWS
Chooses and shows the desired menu option.

A, B, C Keys
Special features of some TV's

TIMER
Displays the Sleep Timer menu. Press repeatedly to set desired TV shut-off time.

POWER
Turns TV On or Off.

MODE
Selects the remote's mode of operation

MUTE
Turns sound Off and On while picture remains.

VOLUME (Left/Right)
Increases TV's sound level.

ENTER
Shows Channel/Time, enters channel, or removes any on-screen menus.

QUIT/♪ (Three Functions Key)
Exits from on-screen display, turns the sound enhancement feature on or off, and switches audio between Main source and PIP source.

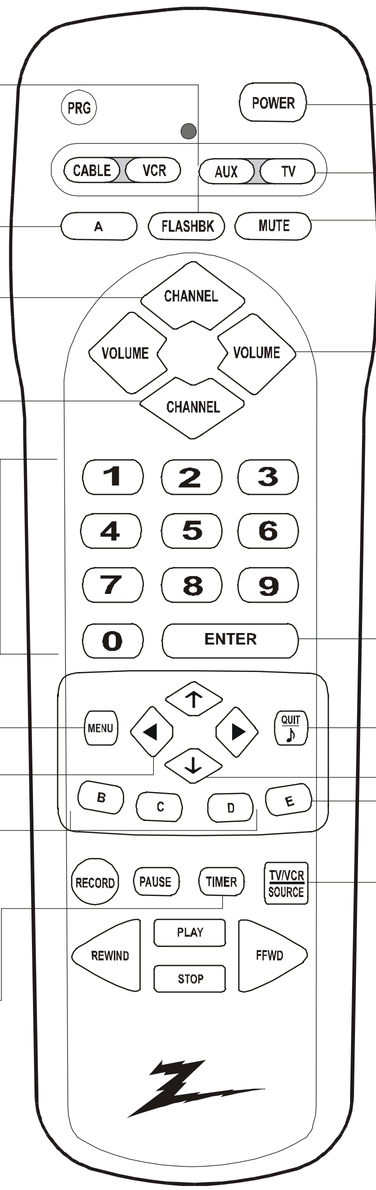

UP and DOWN ARROWS
Moves highlighted bar within menu to select an option.

CC
Displays closed caption menu.

TV/VCR SOURCE
Steps through source options.

MBR3447A
124-00212-58

MBR3446 MODEL REMOTE CONTROL

FLASHBK (Flashback)
Returns to previous Channel.

A Key
Special feature of some TV's

CHANNEL (Up/Down)
Selects next channel in TV's memory. Press and hold to repeat.

NUMBER PAD
Selects channels directly.

MENU
Displays menus for TV and other options.

LEFT/RIGHT ARROWS
Chooses and shows the desired menu option.

B, C, D, E Keys
Special features of some TV's

TIMER
Displays the Sleep Timer menu. Press repeatedly to set desired TV shut-off time.

POWER
Turns TV On or Off.

MODE
Selects the remote's mode of operation

MUTE
Turns sound Off and On while picture remains.

VOLUME (Left/Right)
Increases TV's sound level.

ENTER
Shows Channel/Time, enters channel, or removes any on-screen menus.

QUIT/♪ (Three Functions Key)
Exits from on-screen display, turns the sound enhancement feature on or off, and switches audio between Main source and PIP source.

UP and DOWN ARROWS
Moves highlighted bar within menu to select an option.

CC
Displays closed caption menu.

TV/VCR SOURCE
Steps through source options.

REMOTE PROGRAMMING

PROGRAMMING THE MBR3446 AND MBR3447 REMOTES

If you're using Zenith products, the remote is already programmed for most common codes. For other brands, or if your remote fails to control your Zenith products, you'll have to program the remote.

After installing the batteries, follow these steps for each product:

1. Press and hold PRG using a blunt pointed object. Release PRG after indicator light turns on.
2. Press the device button to be programmed: CATV, VCR, AUX, or TV.
3. Enter 3-digit product code from chart on next page.
4. Press and release ENTER to save code.
5. Point remote at product and press POWER to test product operation. If it does not turn on, reprogram remote using a different code.
6. Write codes on the label inside battery compartment for future reference.

AUTO FIND

If none of the codes in the code table operate your equipment, use Auto Find to search for the proper code.

1. Turn On the device you want to operate.
2. Press and hold PRG using a blunt pointed object. Release PRG after the indicator light turns on.
3. Press the device button to be programmed: CATV, VCR, AUX, or TV.
4. Enter "000", then press ENTER within two seconds. Auto Find is active when the indicator light flashes and remains lit.
5. Point the remote at the product.
6. Press and release POWER repeatedly, about once a second, until your product turns Off. The indicator light turns Off when you press POWER, and On when you release it.
7. Press ENTER immediately to save the code. The indicator light flashes to indicate the code has been saved.
8. Press POWER to turn On your product.
9. Test your product. If the remote fails to operate the functions you use most often, use Auto Find again to search for a better code. (Auto Find resumes its search after the last code that was entered and saved in step 7).

NOTE: If the indicator light stays on as you press POWER, Auto Find has tried all of the codes. If the product you want to control has not turned off, your remote will not work with that product.

To cancel Auto Find, press PRG at any time during Auto Find.

CABLE BOX

These remotes can control cable/converter box volume and muting if available on your equipment.

1. Program the cable/converter box normally.
2. After programming the cable/converter box, Press and hold PRG again using a blunt pointed object. Release PRG after indicator light turns on.
3. Press and release the cable device button.
4. This time, enter the special code 3-9-9 instead of the product code.
5. Press and release ENTER to save.

VOLUME OVERRIDE

These remotes can override TV, VCR, or Video Disk Player volume functions with an amplifier's volume and muting.

1. Program the amplifier normally.
2. After programming the amplifier, Press and hold PRG again using a blunt pointed object. Release PRG after indicator light turns on.
3. Press and release the device button whose volume control is to be replaced by the amplifier volume control. For example, pressing TV will operate the amplifier's volume while the remote is in TV mode.
4. This time, enter the special code 4-9-9 instead of the product code.
5. Press and release ENTER to save.

SPECIAL FEATURES

AUX+1, AUX+2, AND AUX+3 Capability

These remotes can control up to seven devices. If the remote has been programmed for four components using the TV, VCR, CABLE and AUX keys, you may also program it for up to three additional using AUX+1, AUX+2 and AUX+3.

To Program AUX+1, AUX+2, AND AUX+3

1. Locate three-digit code for product in code table.
2. Press and hold PRG until indicator lights up.
3. Press AUX and "1" simultaneously to select AUX+1.
4. Enter three-digit code, then press ENTER. Indicator light should flash, then turn off to indicate code is accepted. If the light stays on, repeat steps 3 and 4 or try a different code.
5. Repeat steps 2-4 for AUX+2 and AUX+3.
6. Write codes on the label inside battery compartment for future reference. Hold down AUX and press 1, 2, or 3 to access AUX+1. +2 or +3 mode.

1164-01/02 Factory mode on opening display.

INSTALLER'S MENU

ACCESS

Access the Service Menu by using the remote control or the keyboard on the front of the set.

With the remote: Press and hold MENU key until user menu displays disappears, then press 9, 8, 7, 6 and ENTER. This will access the 03 H Pos item of the Service Menu.

Models with 6 button Keyboard: Press and hold Menu until User Menu display disappears. Immediately press Volume Up and Channel Down simultaneously.

Models with 10 button keyboard: Press and hold MENU until the user menu disappears. Immediately press the Adj. Right and Channel Up keys simultaneously.

NOTE: Entry into and exit from the Service Menu will automatically unblock all parental control.

To exit Service Menu, press ENTER key. Entry into and exit from the Service Menu, will automatically un-block all parental Control.

DISPLAY

The GA Chassis uses three different microcontrollers (IC6000): 221-01164-01, 221-01164-02, or 221-01305-01. When the Factory menu is accessed, the opening display screen will show the microcontroller on the top line. It will look as shown in Figure 1 or 2. The bar at the top indicates the part number of the software in the set. The bar at the bottom has a date and number. The date on the left indicates the date the module went through the factory. The number on the right indicates the module has been tested.

The first seven menu items 00 through 06 will be the same for each micro. Items 07 through the end will be different on each micro.

When Service Menu appears, it will always appear on third item H Pos. Use SELECT key to toggle through all of the adjustments.

1164-01/02 MICRO

00 F MODE: (Factory Mode) Use Select key to select item #00, which is the first item in the Service Menu, the Factory mode. This item is used by the factory when the module is being tested. In the field, this item should always be left "off". Zero is "Off"!

When the factory mode is Off, only the first seven items in the Service Menu can be accessed. When the factory mode is set to 1, all menu items will be available. Also they will appear on the screen one at a time at the top left of the screen, as shown in Figure 3.

If the factory mode is "On", a pair of dashes will appear at the top of the Customer Set Up Menu. On other menus a number corresponding to the setting of a high lighted item will be shown. This is a quick way a technician can tell that the factory mode is on. Other unusual things also happen when the factory mode in "On", for example, the AC power on feature is always enabled regardless of the setting of "AC On" in the Service Menu. The set will automatically come On when AC is applied. In addition, when the factory mode is "On", the Service Menu can be accessed on 10 button key boards by pressing simultaneously the RIGHT ADJ. and CHANNEL UP buttons. On 6 button keyboards press VOLUME UP and CHANNEL DOWN buttons. Otherwise the hand control must be used to re-enter the Service Menu to turn the factory mode off. The factory mode can also be turned off by adjusting the setting of the clock, or running the Auto Program feature in the customer Set Up menu.

01 Pre Px: Used to store the customer menu adjustments in the non-volatile memory of the EAROM. Settings for Contrasts, Brightness, Color and Tint are stored in this manner. 0 is custom and 1 is Pre-set stored.

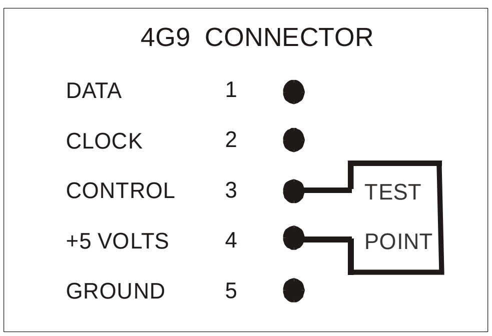

02 V Pos: Moves On Screen Displays vertically. Range is 0 - 24. Generally set at 10.

03 H Pos: Moves On Screen Displays horizontally. Range is 0 - 13. Generally set at 9.

04 Level: There are three positions, 0, 1 and 2. The three different positions are used at the factory to program the module for the correct features. In order to change the level, short pins 3 and 4 together on connector 4G9 on the main module. The connector is located on the left hand side of the module just to the left of the Micro IC6000 on 19" and 20" sets. On the 25" and 27" sets it is on the left edge of the module. Use the Adjust button to change the level. Connector 4G9 is located on the left hand side of the module near the micro.

NOTE: BE CAREFUL!! IF THE WRONG PINS ARE SHORTED, THE MODULE CAN POSSIBLY BE DAMAGED.

NOTE: BE SURE TO REMOVE THE JUMPER AFTER THE LEVEL HAS BEEN SET.

Level 0 and 2 is used for Private Label sets. Level 1 and 2 are used for Zenith sets. In the private label mode the IR code is 21 or 121.

05 Band: There are eight positions. 0 is Broadcast fixed, 1 is CATV afc, 2 is HRC afc, 3 is ICC afc, 4 is Broadcast afc, 5 is CATV fixed, 6 is HRC fixed, and 7 is ICC fixed.

06 AC On: There are two positions, 0 is off and 1 is AC ON. In On position set will turn on and off when AC power is applied and removed.

1164-01 AND 1164-02 MICROCONTOLLER

07 Rf Bpf: (Rf Bandpass) Range is 0 - 1.

08 3.58T: 3.58 MHz trap. Range is 0 - 1.

09 RF Brt: (RF Brightness) Sets adjustment range of the customer control, for brightness in RF mode. Range is 0 - 63.

10 Aux Brt: (Auxiliary Brightness) Sets adjustment range of the customer control, for brightness in AUX mode. Range is 0 - 63.

11 V Size: (Vertical Size) Adjusts the size of the picture vertically. Range is 0 - 63.

12 V Phase: (Vertical Phase) Shifts the picture vertically. Range is 0 - 7.

13 H Phase: (Horizontal Phase) Shifts the picture horizontally. Range is 0 - 31.

14 AudLvl: (Audio Level) Sets the gain for the Composite Audio from Video processor. Range is 0 - 63.

15 RF Agc: Range is 0 - 63. Tune in weakest channel and adjust for a snow free picture.

16 H Afc: There are two settings 0 and 1.

17 WhComp: (White Compression) There are two settings 0 and 1.

18 60 HzSW: (60 Hertz Switched) Range is 0 - 3.

19 PifVco: (PIF Voltage Controlled Oscillator) Range is 2 - 127.

ITEMS #20 THROUGH 24 ARE FOR B&W TRACKING

20 R Cut: Range is 0 - 254.

21 G Cut: Range is 0 - 254.

22 B Cut: Range is 0 - 254.

23 G Gain: Range is 0 - 254.

24 B Gain: Range is 0 - 254.

25 C Type: (Chassis Type) There are six selections, 0 to 5. 0 is mono, 1 is mono W/Aux, 2 is Non MTS Stereo, 3 is Non MTS W/Aux, 4 is MTS chassis and 5 is MTS chassis W/Aux.

26 Scroll: Selects the method the User menus will appear on the screen. Scroll Off is 0.

27 6 Keys: Set to 1 for the 6 key keyboard. Set to 0 for the 10 key keyboard.

1164-01 MICROCONTROLLER

28 SpkSw: Range is 0 - 1. This item is not being used.

29 5 Jacks: Range is 0 - 1. Set to 0.

30 St & Sap: Range is 0 - 1. Set to 0.

1164-02 MICROCONTROLLER

28 SpkrSw: Range is 0 - 1. This item is not being used.

29 Surf: Range is 0 - 1. This item is not being used.

30 Vcurve: Adds Speakers in Set-up menu, Zero is off.

GA Shutdown Circuits

GENERAL INFORMATION

NOTE: 19" and 20" GA1 chassis is a line connected chassis. When servicing chassis, use an isolation transformer to prevent possible shock hazard!! The 25" and 27" GA2 and GA3 chassis has an isolated supply.

Servicing the GA is the same as with other single board chassis. If the set is dead, check the power supply first. First the standby voltages, then the switched voltages. If the switched voltages do not appear check the power "On" circuit.

If the power supply is OK and the set will turn on, then the horizontal sweep needs to be verified next. Is the horizontal drive available from the video processor? If the sweep system does not start-up, sweep derived voltages will not be generated.

If sweep and high voltage is OK and video or audio are missing, then those circuits and the tuner need to be analyzed.

If the receiver is working but some feature or accessory is not working, check the Service Menu.

WARNING: **If the power supply is operational and the set still goes into Shutdown or shuts off, this means that the vertical sweep or X-ray protection is being activated by the micro. Check for vertical pulse at the micro (IC6000) pin 2, or the HV Shutdown Circuit. The set will not turn on again unless the micro is reset by unplugging the AC line cord.**

The Vertical CRT Deflection Circuit must work in order to generate the Vertical (Pulse) Signal, if not, the Vertical Protection Circuit will be activated by the micro and the set will shutdown. In case of X-RAY protection activation, check the +130V source first and then the shutdown network. To turn it on again, reset the microcontroller or unplug the set.

If the sweep and high voltage is OK and video or audio are missing, then those circuits and the tuner need to be checked.

HIGH-VOLTAGE AND X-RADIATION PROTECTION

A potential source of X-rays is the picture tube, if the high-voltage (HV) is out of specification. When the HV is operating properly, there is no X-radiation. For the GA chassis family, the HV has no adjustments. A HV shutdown circuit is used to prevent excessive HV and X-ray emissions.

THEORY OF OPERATION (SHUTDOWN CIRCUIT)

The HV shutdown circuit appears on sheet 4 and sheet 5 of the schematics for 9-1869/71, 9-1789/91 and 9-1996/97 respectively. The basic HV shutdown circuit is illustrated below.

This circuit basically monitors the sweep, pulse voltage derived from the sweep transformer (TX3202 pins 7 & 9 in GA 19/20"; GA1 or TX3204 pins 5 & 6 in GA 25/27"; GA2 and GA3. This voltage is rectified and applied to a 9.1 V zener diode (DX3003 in GA 19/20"; GA1 or ZDX3004 in GA 25/27"; GA2 & GA3). When the HV reaches its maximum allowed value (see table below) the zener diode conducts, the voltage on pin 29 of the video processor (ICX2200) increases until it reaches the threshold voltage of 3.5 VDC, and shuts down the TV.

If the shutdown circuit has operated, the microcontroller will prevent the TV from being turned on again, without first having to unplug and plug the AC cord to reset the microcontroller.

TIP: Make a momentary short circuit between the OUTPUT and GND of the IC6002 (RESET CIRCUIT), this will reset the microcontroller IC6000.

NOTE: In GA 19/20" or GA1 only, the R3212 is used for the CRT heater and the shutdown circuit. So if the video output board is unplugged from the CRT, the voltage on pin 29 of ICX 2200 will be increased, and the shut down circuit will activate. If it is required to test the module without the CRT or without the video output connected, then add a load of 9 OHMS 5% 10W WIREWOUND RESISTOR between pins 9 & 10 of the wireless socket at the video output board.

SERVICING (continued)

HV MEASUREMENT PROCEDURE

Apply signal through the video generator, or tune the TV color receiver to crosshatch pattern. Connect an accurate HV meter between the picture tube anode and chassis ground. Access Video Menu and adjust Brightness and Contrast controls for minimum screen luminance. Wait until the Video Menu or display disappear. Read HV meter.

The HV maximum value for each chassis is specified in the following table:

SCREEN SIZE	B+ VDC (0 BEAM)	HV NOM KV	HV MAX KV
COMPONENT LEVEL REPAIR			
19	130 +/- 0.8	26.5	27
20	130 +/- 0.8	26.5	27
25	124 +/- 0.5	28.5	29
27	124 +/- 0.5	28.5	29

SERVICING THE MODULE

After a module is serviced, access the Service Menu and check that all items are set properly. When the factory mode is off only the first seven items in the Service Menu are available. Place factory mode to 1 to see all Service Menu adjustments. Be sure the factory mode is set to 0, which is Off, when the Service Menu is exited. Also make sure that item 04 LEVEL is set to match the Level as indicated on the model number sticker on the back of the set. The Level is changed by placing a short across pins 3 and 4 of connector 4G9 on the main module. Then using the remote control, bring up the Service Menu and select item 04. Press the adjust button to make a change. Be sure to remove the shorting jumper when the adjustment is completed. Confirm that item #25 is set correctly to match the set being serviced! If not, and No Audio condition will arise.When in the Private label mode, the set will only respond to IR code 121. .

SERVICING THE POWER SUPPLY GA1 19"/20"

NOTE: Use an isolation transformer when servicing 9-1869, 1870, 1871, 1871-01 and 1950 chassis !!

STANDBY VOLTAGES

Check the Standby Voltage at the following points:

+13 volts DC at CX3411

+12 volts DC at pin 1 of ICX3402

+5 volts DC at pin 3 of ICX3402

POWER ON (9-1869/70/71 AND 9-1950)

Keyboard input at IC6000 pin 7 and 8
IR input at IC6000 pin 15
Power "On" output at IC6000 pin 32
Base of QX3402 power supply switching transistor (about 0.7 volts).
+5 volts IC6000 pin 27

SWITCHED VOLTAGES

Turn the set On and check the Switched voltages at the following points.

+130 volts DC at FX3402

+150 volts DC at CX3406

+180 volts DC at + of C3207

SWEEP DERIVED VOLTAGES

+5 volts DC at cathode of ZD3206

+9 volts DC at pin 3 of IC3201

+12 volts DC at + OF CX3213

+14 volts DC at + side of C3222

+25 volts DC at D3202 cathode

+180 volts DC at C3207

SERVICING THE POWER SUPPLY

GA2 & GA3 25"/27" 9-1789/90/91 & 9-1831

Standby Voltages

+150 volts DC at RX3404

+123 volts DC at CX3420

+15 volts DC at emitter Q3403

+5 volts DC at cathode of ZD3401

SWITCHED VOLTAGES

Turn set On and check the Switched voltages at the following points:

+5 volts DC at cathode of ZD3402

+9 volts DC at pin 3 of IC3431

+15 volts DC at collector of Q3404

+15 volts DC at collector of Q3403

SWEEP DERIVED VOLTAGES

+25 volts DC at RX3242

+35 volts DC at CX3272

+215 volts DC at junction CX3296 and RX3277

CRT filament at pins 1 and 2 of connector 2F5

VIDEO PROCESSOR ICX2200

Key Operating Signals:

Composite Video out at pin 47

Video in at pin 37

Luminance in pin 43

Chroma in pin 45

Composite Audio out at pin 2

Horizontal Drive at pin 32

Vertical Drive at pin 24

Video Output Blue at 2C5 pin 3

Video Output Green at 2C5 pin 2

Video Output Red at 2C5 pin 1

B+ 9 volts pins 9, 46 and 48

Serial Data, Serial Clock pins 27 and 28

VERTICAL CIRCUIT

Vertical drive pulse pin 4

+25 volts pin 6

Vertical out pin 2

HORIZONTAL CIRCUIT

Horizontal drive to base of Q3201 predriver

Driver transformer output base of Q3202

Shutdown voltage anode ZFX3004

SERVICE ADJUSTMENTS (Mechanical)

1. Video Gain (19"/20" Models) Adjusts R9738 for 1

volt P-P at emitter of Q9706.

2. Audio Balance (19"/20" Models) Adjusts R9745 for equal output at collectors of Q9701 and Q9703.

3. HORIZONTAL WIDTH (25"/27" Models) Adjusts R3249 for 1/2" overscan on both sides of the picture.

FOCUS ADJUSTMENT

Connect a color bar pattern to the receiver and adjust the user controls for a good picture. Adjust the Focus control, then push the menu button to video menu then proceed until there is no distortion in the letters of the menu.

GA1/GA2 RGB CUTOFF (1164 Micro)

The G2 control must be adjusted before RGB drive.

1. If the main module or CRT has been replaced, set items #23 G GAIN and #24 B GAIN, in the Service

	GA1		**GA2**	
Tube Size	19″	20″	25″	27″
Customer Contrast	0	0	0	0
RF Bright/Aux Bright	36	36	26	28
Customer Brightness	31	31	31	31
Red Cutoff	0	0	10	5
Green Cutoff	0	0	10	5
Blue Cutoff	0	0	10	5
Green Gain	90	90	90	90
Blue Gain	90	90	90	90

Menu, to the default setting for the correct screen size as listed in the Service Menu (see above table).

2. Set color level to minimum and Tint to midrange.
3. Connect the output of an NTSC generator to the antenna input of the receiver. Set the generator to a pure white signal, chroma off.
4. Access the Service menu to gain access to the cut-off adjustments, (Factory mode item 00 must be set to 1 to gain access to these adjustments).
5. Set items 22 R Cut, 23 G Cut and 24 B. Cut to the values shown in the above table.
6. Carefully observe which color is predominant on the CRT - DO NOT adjust the cutoff control for this color. Adjust the other two cutoff controls for the best white screen display.
7. Set the generator to a color bar patter and turn the chroma off. Check that the set displays a good gray scale from black to white. If black level is too high readjust the item #9 RF Brightness.
8. Return the color level control to normal.

GA3 OF RGB CUTOFF (1305 Micro)

The G2 control must be adjusted before RGB drive.

1. If the main module or CRT has been replaced, select

	GA3	
Tube Size	25″	27″
Customer Contrast	0	0
RF Bright/Aux Bright	40	40
Customer Brightness	32	32
Color Temp	Cool	Cool
Red Cut 1	15	15
Green Cut 1	8	5
Blue Cut 1	12	12
Green Gain 1	95	100
Blue Gain 1	70	80
Color Temp	Warm	Warm
Red Cut 2	15	16
Green Cut 2	10	8
Blue Cut 2	17	16
Green Gain 2	70	75
Blue Gain 2	25	32

"Cool" in the user video menu under Color Temp. Then set items #25 Gain 1 (Green gain cool) and #26 B Gain 1 (Blue gain cool), in the Service Menu to the default setting for the correct screen size as listed in the Service Menu (see table above). Set Color level to minimum and Tint to mid range.

2. Connect the output of an NTSC generator to the antenna input of the receiver. Set the generator to the Pure white signal, chroma off.
3. Access the Service Menu to gain access to the cut-off adjustments, (Factory mode item 00 must be set to 1 to gain access to these adjustments).
4. Set items 22 R Cut, 23 G Cut, 24 B cut to the values shown in the table.
5. Carefully observe which color is predominant on the CRT. DO NOT adjust the cutoff control of this color. Adjust the other two cutoff controls for the best white screen display.
6. Set the generator to a color bar pattern and turn

the chroma Off. Check that the set displays a good gray scale from black to white. If black level is too high, readjust the item #9 RF Brightness.

7. Return the color level control to preset.
8. Select “Warm” in the user video menu under Color Temp. Then adjust items 22 R Cut, 23 G Cut, 24 B Cut, 25 G Gain 2 and 26 B Gain 2 according to the following formulas:

   R Cut2 Warm = R Cut 1 Cool +3

   G Cut2 Warm = G Cut 1 Cool +3

   B Cut2 Warm = B Cut 1 Cool +4

   G Gain2 Warm = G Gain 1 Cool -25

   B Gain2 Warm = B Gain Cool -48

9. Select “Cool” in the user video menu under Color Temp.

PURITY & CONVERGENCE SETUP PROCEDURE

PRELIMINARY SETUP

1. Allow receiver to warm up for 15 to 20 minutes.
2. Degauss receiver.
3. Connect crosshatch generator to the receiver and "rough in" the static (center) convergence.

   Follow Convergence Status.
4. Adjust for best focus.

PURITY ADJUSTMENT

1. Purity tab positioning

   Set the 2 pole purity tab together at 3 or 9 o' clock positions and the 4 and 6 pole purity tabs together at 12 of 6 o' clock positions.
2. Move yoke to maximum forward funnel position.
3. Now switch crosshatch generator to a red field.
4. Pull yoke towards rear of CRT neck centered or until red raster is displayed.
5. If red raster is not displayed as a pure red field, adjust the 2 pole purity tabs until a pure field is obtained.
6. Check for proper yoke tilt setting.

CONVERGENCE ADJUSTMENT

1. Release locking assembly
2. Connect crosshatch generator to the receiver and adjust static (center) convergence as follows:

a.Adjust the 4 pole static control by moving the two tabs separately to converge red and blue lines horizontally. Move the two tabs together around neck of CRT in a 45° arc) from the top dead center position to converge red and blue lines vertically.

b. After the 4 pole control has been adjusted to superimpose the red and blue lines on top of one another. Use the 6 pole static adjustment to place converged red and blue lines over the green line. Move the two tabs together around neck of CRT (in a 30° arc) from the top dead center position to move the lines vertically. Adjusting the two tabs separately will move converged beam to the left or right. Using a cross hatch generator capable or producing individual fields, adjust generator to produce a red field. Use purity tabs to center a red stripe.

CRT Ring Location Purity Adjust Tabs Beam Movement for Convergence

Ring Pairs	Rotation direction of Both Tabs	Movement of Red and Blue Beams
6 Pole	Opposite	B R OR B R
Convergence R&B over G	Same	B R OR B R
4 Pole	Opposite	B R OR B R
Convergence R over B	Same	B R OR B R

VERTICAL-TILT WEDGE ADJUSTMENT

The vertical lines at 6 and 12 o'clock are converged by vertically tilting the yoke and inserting a wedge at the top of the yoke until it is firmly seated between the CRT glass and the horizontal coils.

HORIZONTAL-TILT WEDGE ADJUSTMENT

The vertical lines at 3 o'clock and 9 o'clock are converged by horizontally tilting the yoke and inserting a wedge. Adjust first at 4 or 8 o'clock, whichever has the larger space, until the wedge is firmly seated between the CRT glass and yoke coils. Then, insert the 3rd wedge in the remaining horizontal tilt position until it is firmly seated between the CRT glass and yoke coils. Convergence at 3 and 9 o'clock should be maintained during this operation.

When the 3 wedges are firmly installed and positioned for acceptable convergence, lock the wedges in place by applying a 2.5 inches long strip of tape across the tabs of each wedge, firmly against the CRT glass. The CRT glass surface should be clean and free of dust and other foreign material.

UNUSUAL TILT CASE

There may be some instances where the picture tube and yoke will require vertical tilt in the opposite (up) direction to obtain convergence. In such cases, insert the vertical tilt wedge at the bottom (6 o'clock) position. Follow through on the horizontal tilt adjustment by using the 2 and 10 o'clock positions and secure each wedge with a piece of tape, as described above.

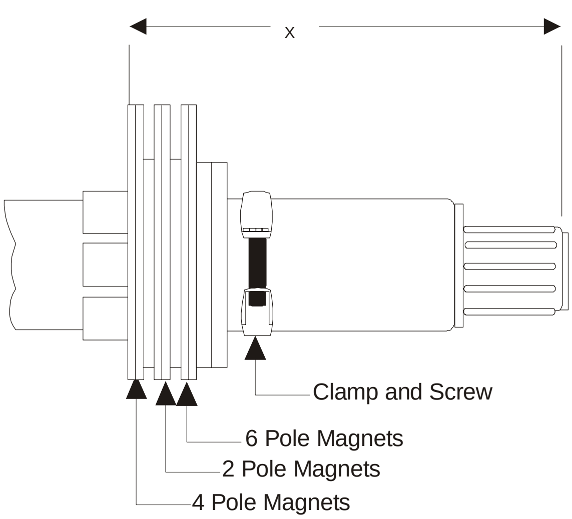

IMPROVING CRT CORNER PURITY

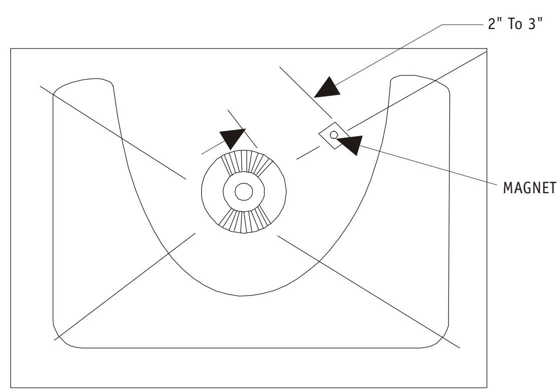

CRTs that display corner purity problems even after following the service procedures can be modified with a picture correction kit (P/N 949-50). The purity can be improved by placing a picture-correction magnet (included in the kit) on the CRT funnel. Refer to the following modification steps and illustration to place the magnet properly. Fully degauss the CRT before installing correction magnets.

MODIFICATION

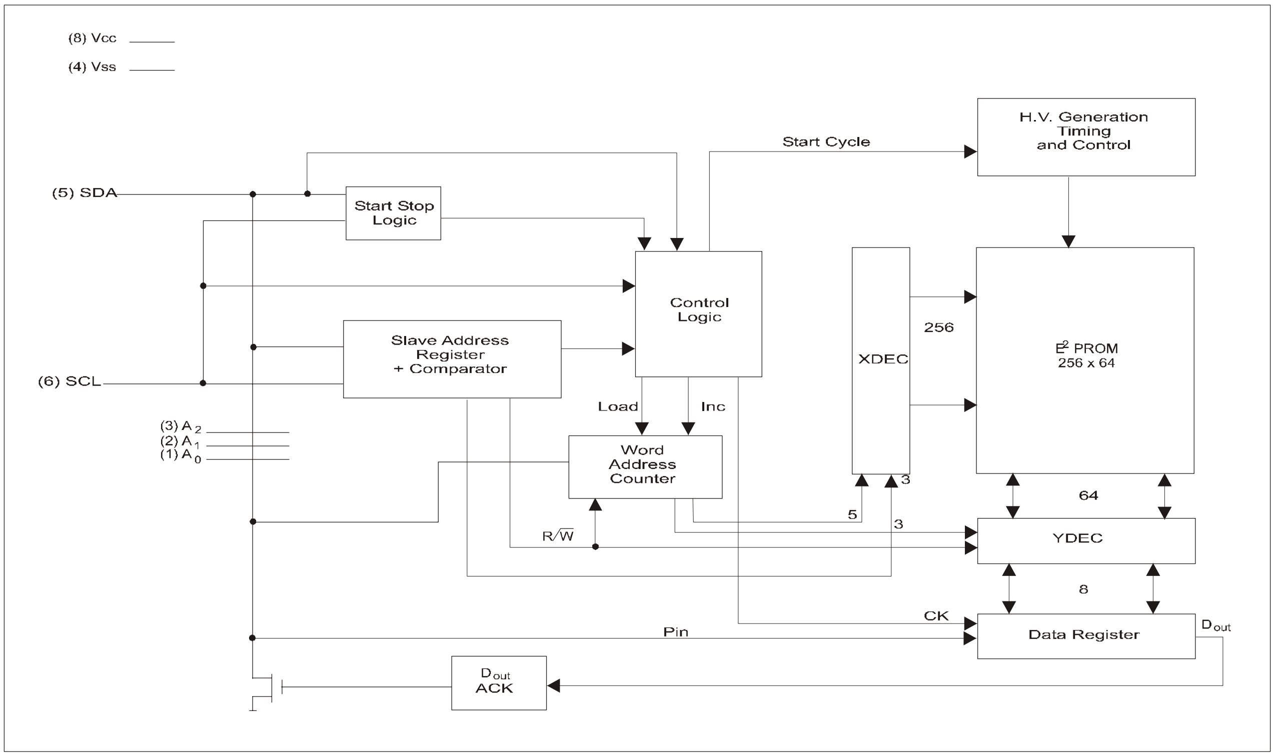

1. Place the magnet on the CRT funnel as shown in the figure displayed below, in the quadrant exhibiting impurity.
2. Rotate the magnet in place to the position shown for best purity.
3. Place a piece of 1/2" by 2" long Fiberglass tape over the magnet to hold it in place.
4. Degauss the CRT once magnet is in place to insure that the magnet is not over the internal magnet shield.

NOTE: If the magnet is placed over the internal magnet shield, any apparent purity correction will disappear after degaussing. Reposition the correction magnet off the internal shield and degauss again.

Part#	Description
009-02041	MODULE, MAIN, 25V MTS, GA3 CHASSIS
012-10694	METAL STAMPING , BRACKET, CRT SUPPORT
012-10832	METAL STAMPING , BRACKET, CRT MOUNTING
012-10832-01	METAL STAMPING , BRACKET, CRT MOUNTING
012-10858-04	MOLDED PLASTIC , PANEL, JACK PACK, CA CHASSIS
014-12038-02	CABINET TRAY, TV, MOLDED PLASTIC
014-12229-16	CABINET FRONT, TV, MOLDED PLASTIC
014-12230-03	CABINET REAR, TV, MOLDED PLASTIC,
020-04330-35	COIL, DEGAUSSER
049-01368-03	SPEAKER, OVAL, 6 X 13 CM
050-01699-03	CONNECTOR&CABLE, ASSY, 2.5 MM, 5 CONTACT, 2 UP
050-02576	CONNECTOR&CABLE, ASSY, 2.5MM, 4 CONTACT, 1 UP
095-04531	DEFLECTION YOKE
A63AFW36X	VACUUM TUBE, CRT, COLOR, 25 INCH DIAGONAL
124-00212-35	SPACE COMMAND, TRANSMITTER, MBR3447
152-00335	WEDGE, YOKE SPACER,POSITIONER
192-00887	LENS, INFRARED
206-03436	INSTR BOOK, OPERATION GUIDE
A-07690-06	MAGNET ASSEMBLY, STATIC CONVERGENCE AND PURITY
A-18588-01	LINE CORD ASSY , WITH YEONHO CONNECTOR
A-18695-02	GND STRAP ASSY , CRT
046-10561	KNOB ARRAY, PUSH BUTTON, 10 POSITIONS
194-02535-01	PAD, BUTTONS
A-18295	KEYBOARD ASSEMBLY, WITH IR RECEIVER, AGUA CHASSIS

A25A22BT84

Part#	Description
009-02041	MODULE, MAIN, 25V MTS, GA3 CHASSIS
012-10694	METAL STAMPING , BRACKET, CRT SUPPORT
012-10832	METAL STAMPING , BRACKET, CRT MOUNTING
012-10832-01	METAL STAMPING , BRACKET, CRT MOUNTING

012-10858-04	MOLDED PLASTIC , PANEL, JACK PACK, CA CHASSIS
014-12038-02	CABINET TRAY, TV, MOLDED PLASTIC
014-12229-16	CABINET FRONT, TV, MOLDED PLASTIC
014-12230-03	CABINET REAR, TV, MOLDED PLASTIC
020-04330-35	COIL, DEGAUSSER
049-01368-03	SPEAKER, OVAL, 6 X 13 CM
050-01699-03	CONNECTOR&CABLE, ASSY, 2.5 MM, 5 CONTACT, 2 UP
050-02576	CONNECTOR&CABLE, ASSY, 2.5MM, 4 CONTACT, 1 UP
095-04531	DEFLECTION YOKE
A63AFW36X	VACUUM TUBE, CRT, COLOR, 25 INCH DIAGONAL
124-00212-35	SPACE COMMAND, TRANSMITTER, MBR3447
152-00335	WEDGE, YOKE SPACER,POSITIONER
192-00887	LENS, INFRARED
206-03436	INSTR BOOK, OPERATION GUIDE
A-07690-06	MAGNET ASSEMBLY, STATIC CONVERGENCE AND PURITY
A-18681-01	LINE CORD ASSY , WITH YEONHO CONNECTOR
A-18695-02	GND STRAP ASSY , CRT
046-10561	KNOB ARRAY, PUSH BUTTON, 10 POSITIONS
194-02535-01	PAD, BUTTONS
A-18295	KEYBOARD ASSEMBLY, WITH IR RECEIVER, AGUA CHASSIS

A25A23W

Part#	Description
009-01996	MODULE, MAIN, 25V MTS, GA3 CHASSIS
012-10571	METAL STAMPING , BRACKET, CRT MOUNTING
012-10858-04	MOLDED PLASTIC , PANEL, JACK PACK, CA CHASSIS
014-12143-02	CABINET TRAY, MOLDED PLASTIC

Part#	Description
009-01997-01	MODULE, MAIN, WITH MTS, 27V GA3 CHASSIS
012-10568	METAL STAMPING , BRACKET, CRT SUPPORT
012-10858-04	MOLDED PLASTIC , PANEL, JACK PACK, CA CHASSIS
012-10900	METAL STAMPING , BRACKET, CRT MOUNTING
014-12038-02	CABINET TRAY, TV, MOLDED PLASTIC
014-12185-10	CABINET REAR, TV, MOLDED PLASTIC
014-12186-29	CABINET FRONT, TV, MOLDED PLASTIC
020-04330-30	COIL, DEGAUSSER
049-01368-03	SPEAKER, OVAL, 6 X 13 CM
050-01699-03	CONNECTOR&CABLE, ASSY, 2.5 MM, 5 CONTACT, 2 UP
050-02361	CONNECTOR AND, CABLE ASSEMBLY, 35V CTV YOKE
050-02576	CONNECTOR&CABLE, ASSY, 2.5MM, 4 CONTACT, 1 UP
124-00212-35	SPACE COMMAND, TRANSMITTER, MBR3447
192-00858-01	LENS, PRIMARY CONTROLS AND IR
206-03436	INSTR BOOK, OPERATION GUIDE
A-18681-01	LINE CORD ASSY , WITH YEONHO CONNECTOR
A-18695-02	GND STRAP ASSY , CRT
A-19058	CRT AND YOKE, ASSEMBLY
046-10554	KNOB ARRAY, PUSH BUTTON, 10 POSITIONS
194-02535	PAD, BUTTONS
A-18232	KEYBOARD ASSEMBLY, WITH IR RECEIVER

A27A23W

Part#	Description
009-01997	MODULE, MAIN, WITH MTS, 27V GA3 CHASSIS
012-10858-04	MOLDED PLASTIC , PANEL, JACK PACK, CA CHASSIS
014-12281-04	CABINET FRONT, TV, MOLDED PLASTIC
014-12282-04	CABINET REAR, TV, MOLDED PLASTIC
020-04330-30	COIL, DEGAUSSER
049-01368-03	SPEAKER, OVAL, 6 X 13 CM
050-01699-03	CONNECTOR&CABLE, ASSY, 2.5 MM, 5 CONTACT, 2 UP
050-02576	CONNECTOR&CABLE, ASSY, 2.5MM, 4 CONTACT, 1 UP
095-03797-05	DEFLECTION YOKE
A68AGD02X	VACUUM TUBE, CRT, COLOR, 27 INCH DIAGONAL
124-00212-35	SPACE COMMAND, TRANSMITTER, MBR3447
152-00335	WEDGE, YOKE SPACER,POSITIONER
192-00912	LENS, PRIMARY CONTROLS AND IR
206-03373	INSTR BOOK, OPERATION GUIDE
A-18588-01	LINE CORD ASSY , WITH YEONHO CONNECTOR
A-18695-02	GND STRAP ASSY , CRT
046-10588	KNOB ARRAY, PUSH BUTTON, 6 POSITION
194-02663	PAD, BUTTONS
A-18769	KEYBOARD ASSEMBLY, 6 BUTTON

A27A23W4

A-14323	BALUN ASSEMBLY
A-18588-01	LINE CORD ASSY , WITH YEONHO CONNECTOR
A-18695-10	GND STRAP ASSY , CRT
046-10554	KNOB ARRAY, PUSH BUTTON, 10 POSITIONS
194-02535	PAD, BUTTONS
A-18232	KEYBOARD ASSEMBLY, WITH IR RECEIVER

LGA29A23WM

Part#	Description
009-01997	MODULE, MAIN, WITH MTS, 27V GA3 CHASSIS
012-10858-04	MOLDED PLASTIC , PANEL, JACK PACK, CA CHASSIS
014-12281-04	CABINET FRONT, TV, MOLDED PLASTIC
014-12282-04	CABINET REAR, TV, MOLDED PLASTIC
020-04330-30	COIL, DEGAUSSER

049-01368-03	SPEAKER, OVAL, 6 X 13 CM
050-01699-03	CONNECTOR&CABLE, ASSY, 2.5 MM, 5 CONTACT, 2 UP
050-02576	CONNECTOR&CABLE, ASSY, 2.5MM, 4 CONTACT, 1 UP
095-03797-05	DEFLECTION YOKE
A68AGD02X	VACUUM TUBE, CRT, COLOR, 27 INCH DIAGONAL
124-00212-35	SPACE COMMAND, TRANSMITTER, MBR3447
152-00335	WEDGE, YOKE SPACER,POSITIONER
192-00912	LENS, PRIMARY CONTROLS AND IR
206-03414	INSTR BOOK, OPERATION GUIDE, ZENITH, SPANISH
A-14323	BALUN ASSEMBLY
A-18588-01	LINE CORD ASSY , WITH YEONHO CONNECTOR
A-18695-02	GND STRAP ASSY , CRT
046-10588	KNOB ARRAY, PUSH BUTTON, 6 POSITION
194-02663	PAD, BUTTONS
A-18769	KEYBOARD ASSEMBLY, 6 BUTTON
